

Degree	University/Institute	Year	CGPA/Marks(%)
B.Tech Mechanical and Aerospace Engineering	IIT Hyderabad	2027	8.55
Minor in Aerospace Engineering	IIT Hyderabad	2027	N.A
XII (GSHSEB)	Shree saraswati vidhyalay	2023	75.00%
X (GSEB)	DRGD School	2021	96.00%

SCHOLASTIC ACHIEVEMENTS

- Secured All India Rank (OBC) **Under 1500** among **1.1 Million** candidates in JEE MAINS 2023
- Secured All India Rank (OBC) **Under 2000** among **0.2 Million** candidates in JEE Advanced 2023
- Cleared **NTSE Stage 1** (state) & **Stage 2** (National) in 2021 ; *Selected as one of 2000 Students Nationwide by NCERT*

POSITIONS OF RESPONSIBILITY

- Students Representative** (*BUDGET HEAD*) | NSS IIT HYD
- Finance & Equipment coordinator** | EBSB IIT HYD
- UG Mentor** | Sunshine (Counselling cell) IITH
- Inbound Coordinator** | International Relations Cell

SKILLS

- Programming Languages:** C/C++ (Proficient), Python (Familiar), SQL (Familiar), HTML/CSS, JavaScript
- Technical Knowledge:** Data Structures & Algorithms, Object-Oriented Programming (OOP)
- Machine Learning:** Supervised Learning (Classification, Regression), Feature Engineering, Model Deployment

RELEVANT COURSES

- Computer Science & Electrical :** Introduction to Programming, Intro to Modern AI, Basic Electrical Engineering
- Mathematics:** Calculus I, Calculus II, Elementary Linear Algebra, Differential Equations, Intro to Probability, Transform Techniques, Complex Variables, Intro to Statistics
- Miscellaneous:** Communication Skills, Intro to Entrepreneurship, Intro to Aerospace Vehicles

PROJECTS

Enterprise Leave & Asset Management System | *React, Python, FastAPI, SQLAlchemy*

- Engineered a full-stack enterprise portal to streamline employee leave approvals and IT hardware allocation workflows.
- Implemented secure Role-Based Access Control (RBAC) with JWT authentication, enforcing strict authorization rules across Admin, HR, and Employee tiers.
- Designed a scalable RESTful API architecture using FastAPI and modeled normalized relational databases using SQLAlchemy to track approval workflows and audit trails.
- Built a role-aware frontend shell using React and Vite, and ensured backend reliability through comprehensive automated testing with Pytest.

SMS-Based Financial Analysis Tool

- Automated the process of personal expense tracking by building a Python tool that reading and organizing Information from bank SMS alerts, reducing manual data entry.
- Designed a flexible system using custom rules (regex) and a keyword-based categorization system that successfully processed over 2,500 messages, classifying transactions from different banks into relevant categories like Food, Shopping, Bills and UPI.
- Created a reporting feature that produced financial summaries, bank-specific reports, and a daily spending chart, providing clear insights into personal spending habits.

Customer Churn Prediction

- Built and deployed an end-to-end ML model using Python (scikit-learn, Streamlit) to predict customer churn, applying EDA, feature engineering, and model optimization, achieving ~85% accuracy.

EXTRACURRICULAR

- Active member of **Grow Native Green NGO** a Weekend plantation group aiming to root and grow Indian breeds
- Selected as Campus Ambassador, Igniters Club** – Set to represent and promote entrepreneurship initiatives within the campus community.
